USAID (winding down)

One-page brief

Priority: 24 of 33 (score 2.5). **FY2026 outlays:** $11.7B (USAspending). **As of:** 2026-10-27. Public data only.

Bottom line

USAID's programs were moved into the State Department in 2025, but the agency still spent $11.7B in FY2026 closing out awards. Close-out is a risky period: advances not returned, unsupported final costs, and assets left with partners. The work belongs with state.pdf going forward; the specific USAID task is a close-out recovery screen.

Exposure

- $11.7B in outlays and $18.5B in budgetary resources in FY2026, mostly legacy awards.
- USAID OIG historically reported diversion of aid and partner fraud in conflict zones.

Public data we can use

- **USAspending and ForeignAssistance.gov:** awards, obligations and outlays by partner, including terminated awards.
- **SAM.gov** exclusions; USAID OIG reports.

Detection plays

1. **Unliquidated advances:** terminated awards where obligations far exceed outlays, ranked for recovery follow-up.
2. **Partner history:** implementers with prior OIG findings now receiving State awards.

First prototype

A close-out table of terminated USAID awards with remaining balances and partner risk flags.

Limits

Close-out financial status is not fully public.
