PRIORITY 31 OF 33 · SCORE 1.8

PCOR Trust Fund

This trust fund is not an agency in the usual sense. USAspending lists it separately; it funds the Patient-Centered Outcomes Research Institute (PCORI) and related HHS research work. Fraud risk is typical of research grants: duplicate funding and unsupported costs. It is best folded into the cross-agency research award screen rather than worked on alone.

INVESTIGATIONS WE PROPOSE

- **PCOR-1** PCORI awards in the duplicate-award screen against NIH and NSF. **First prototype.**
- **PCOR-2** Awardees on LEIE or SAM exclusions.

EXPOSURE

- $1.1B in outlays in FY2026.

PUBLIC DATA WE USE

- **PCORI funded projects** (awardee, PI, amount, abstract).
- **NIH RePORTER, NSF Award Search, SBIR.gov** for overlap.

HOW WE DETECT IT

1. **Duplicate research** across PCORI, NIH and NSF.
2. **Awardee links** to excluded parties (LEIE, SAM.gov).

FIRST PROTOTYPE

Add PCORI awards to the cross-agency duplicate-award screen.

WHY PRIORITY 31

Exposure	●○○○○
Public data	●●●○○
SBA method fit	●●○○○
Actionability	●○○○○

OUR REVIEW, DELIVERED WEEK 12

Add PCORI funded projects to the duplicate-award screen against NIH and NSF; check awardees against LEIE and SAM.

Every lead goes to an Inspector General or DOJ as a referral package with sources and caveats. Nothing is published.

WHAT WE ASK OF PCORTF

Phase 2 data: Full proposals and budgets, PI current-and-pending support.

What it enables: Duplicate funding at the proposal level.

Access route: Each OIG.

LIMITS

PCORI is a private nonprofit; its subawards are not in USAspending.

SOURCES

- PCORI funded projects
- USAspending agency profiles (FY2026 outlays)

Scores and plans are our judgment from public sources. Risk indicators are leads for Inspectors General or DOJ, not accusations.
