PRIORITY 6 OF 33 · SCORE 3.7

General Services Administration

GSA is the best technical partner in government for this program because it owns the data spine every brief uses: SAM.gov (entities and exclusions), FPDS (contracts) and the Multiple Award Schedules that other agencies buy through. Its own fraud risks are schedule pricing fraud, purchase card misuse and lease fraud. A GSA pilot improves the shared data for every other agency at once.

INVESTIGATIONS WE PROPOSE

- **GSA-1** SAM.gov shell clusters ranked by award dollars. **First prototype.** One-page pitch available.
- **GSA-2** New UEIs tied to excluded entities.
- **GSA-3** Schedule price, labor rate and lease outliers.

EXPOSURE

- $38B in outlays (leases, Federal Buildings Fund, IT and schedules), plus tens of billions a year in orders other agencies place on GSA schedules.
- Schedule contractors who misstate commercial pricing or sell non-compliant goods are a recurring False Claims Act case type.
- GSA SmartPay purchase and travel cards carry misuse risk across agencies.

PUBLIC DATA WE USE

- **SAM.gov:** entity registrations, owners, addresses, exclusions.
- **FPDS / USAspending:** every contract action, including schedule orders.
- **GSA Advantage and CALC** schedule price data.
- **GSA lease inventory** (lessor, location, rent).
- **GSA OIG** reports and DOJ settlements.

HOW WE DETECT IT

1. **Price outliers:** schedule prices far above peers for the same item or labor category.
2. **Registration red flags:** many SAM.gov registrations at one address, recycled officers across UEIs, and firms that re-register after exclusion.
3. **Lease risk:** lessors linked to officials or shell entities, and rents far above local comparables.

WHY PRIORITY 6

Exposure	●●○○○
Public data	●●●●●
SBA method fit	●●●●●
Actionability	●●●○○

FIRST PROTOTYPE

A SAM.gov registration integrity report: clusters of entities sharing addresses, officers or bank-like identifiers, ranked by award dollars. This is the SBA entity screen run government-wide.

OUR REVIEW, DELIVERED WEEK 10

SAM.gov registration integrity report (also offered to GSA as a data-quality product); price and lease outlier tables.

Every lead goes to an Inspector General or DOJ as a referral package with sources and caveats. Nothing is published.

WHAT WE ASK OF GSA

Phase 2 data: SAM.gov sensitive fields (TINs, bank data), SmartPay transactions.

What it enables: Shell detection by shared TIN and bank account; purchase card misuse.

Access route: GSA IAE; GSA OIG.

LIMITS

Purchase card transactions and SAM.gov sensitive fields (bank data, TINs) are not public.

SOURCES

- SAM.gov data services
- GSA SmartPay audit repository
- USAspending agency profiles (FY2026 outlays)

Scores and plans are our judgment from public sources. Risk indicators are leads for Inspectors General or DOJ, not accusations.
