PRIORITY 31 OF 33 · SCORE 1.8

Nuclear Regulatory Commission

The NRC is a regulator funded mostly by license fees. Its spending fraud risk is small and limited to ordinary contracts. Its relevant fraud is regulatory: falsified safety records and counterfeit or substandard parts in the nuclear supply chain. That is outside the SBA method, so the NRC is low priority for this program.

INVESTIGATIONS WE PROPOSE

NRC-1 Suppliers in Part 21 defect reports and enforcement actions matched to contractor records. **First prototype.**

EXPOSURE

- $0.86B in outlays in FY2026.
- Counterfeit, fraudulent and suspect items in the supply chain are a known NRC concern.

PUBLIC DATA WE USE

- **NRC ADAMS** document library (inspection and enforcement records).
- **FPDS** for NRC contracts; **SAM.gov** exclusions.

HOW WE DETECT IT

1. **Supplier screen:** nuclear-grade suppliers tied to enforcement actions or excluded parties.

FIRST PROTOTYPE

None proposed; include NRC contracts in the government-wide contractor screen.

WHY PRIORITY 31

Exposure	●○○○○
Public data	●●●○○
SBA method fit	●●○○○
Actionability	●○○○○

OUR REVIEW, DELIVERED WEEK 13

NRC contracts in the contractor screen; match suppliers named in public 10 CFR Part 21 defect reports and NRC enforcement actions against federal contractor records.

Every lead goes to an Inspector General or DOJ as a referral package with sources and caveats. Nothing is published.

WHAT WE ASK OF NRC

Phase 2 data: Contract invoices; HIDTA grant reports.

What it enables: Ordinary contract and grant checks.

Access route: Each OIG.

LIMITS

Supply-chain data is mostly held by licensees.

SOURCES

- NRC ADAMS
- USAspending agency profiles (FY2026 outlays)

Scores and plans are our judgment from public sources. Risk indicators are leads for Inspectors General or DOJ, not accusations.
