PRIORITY 11 OF 33 · SCORE 3.3

Office of Personnel Management

OPM runs two big payment streams: federal retirement ($109B in FY2025) and the Federal Employees Health Benefits program (about $70B, 8.2 million members). Retirement error rates are low, but GAO found in April 2026 that FEHB paid deceased, incarcerated and excluded providers, and that OPM's own debarment list is out of step with the HHS and SAM exclusion lists. That cross-list gap is something we can measure with public data alone.

INVESTIGATIONS WE PROPOSE

- **OPM-1** Providers excluded by HHS or SAM but missing from OPM's list. **First prototype.**
- **OPM-2** Deactivated or deceased NPIs still in carrier networks.
- **OPM-3** Medicare-flagged providers serving FEHB members.

EXPOSURE

- Federal Retirement Services: $109.4B outlays, about $364M improper (0.33%) in FY2025.
- FEHB: about 400 deceased providers paid for services at least 50 days after death; over 2,000 claims from providers excluded elsewhere; over 2,500 claims from providers OPM had already debarred. (GAO, CY2022 claims)
- Over 85% of OPM OIG's debarment records lack an NPI, and at least 1,200 LEIE entries that meet OPM's debarment criteria are missing from its list.

PUBLIC DATA WE USE

- **HHS-OIG LEIE, SAM.gov exclusions, and OPM OIG's debarment list.**
- **NPPES** NPI registry (addresses, taxonomies, deactivation dates).
- **CMS provider data** to profile FEHB-overlapping providers.
- **OPM OIG investigative summaries** as labeled cases.

HOW WE DETECT IT

1. **Exclusion list reconciliation:** match the three exclusion lists on name, NPI, address and license to find providers barred in one program and not another.
2. **Dead and deactivated providers:** NPIs deactivated or tied to deceased individuals that still look active in carrier networks.
3. **Cross-program spillover:** providers flagged in Medicare work (see HHS) who also serve FEHB members.

WHY PRIORITY 11

Exposure	●●●●○
Public data	●●●○○
SBA method fit	●●●○○
Actionability	●●●○○

FIRST PROTOTYPE

An exclusion-list reconciliation report: every provider excluded by HHS or SAM but missing from OPM's list, with matched identifiers. This reuses the HHS provider pipeline almost unchanged.

OUR REVIEW, DELIVERED WEEK 10

Reconciliation report with matched identifiers; review memo.

Every lead goes to an Inspector General or DOJ as a referral package with sources and caveats. Nothing is published.

WHAT WE ASK OF OPM

Phase 2 data: FEHB carrier claims, retirement payee data.

What it enables: Provider claims after death or exclusion; dead annuitants.

Access route: OPM OIG.

LIMITS

FEHB claims are held by carriers and are not public, so we cannot see what was paid to whom. Retirement payee data is not public.

SOURCES

- GAO-26-108139: FEHB provider eligibility risks (April 2026)
- PaymentAccuracy.gov: OPM Federal Retirement Services
- FedWeek: OPM OIG retirement and FEHB fraud cases
- USAspending agency profiles (FY2026 outlays)

Scores and plans are our judgment from public sources. Risk indicators are leads for Inspectors General or DOJ, not accusations.
