Status: Draft v0.1 (2026-11-03), for Steve's review. Public data only. Extends the top 33 ranking, the review plan and the roadmap to every federal body we could identify, and relies on the forensic methods handbook for how each test is computed.

1 Bottom line

We identified **137 federal bodies**: the 111 agencies on USAspending's list, 19 bodies that are not on it (the Postal Service, TVA, Amtrak, the judiciary, the legislative branch and others) and 7 government corporations that report through a parent department. Every one now has a tier and a named set of screens.

- **The top 33 already cover 99.9% of the money USAspending reports.** In FY2026 they paid out $9,561 billion of $9,570 billion; the other 78 listed agencies together paid about $8.2 billion. Going broader is not mainly about dollars in USAspending.
- **Going broader matters for three other reasons.** First, large money sits outside USAspending's list (the Postal Service, TVA, the federal judiciary). Second, small agencies bring schemes the top 33 do not (court-appointed counsel vouchers, settlement refund claims, arts and regional grants). Third, a government-wide proposal to OMB and the Inspectors General needs every agency covered, not just the large ones.
- **Only 15 agencies report improper payment estimates** (FY2025: about $186 billion across 64 programs, GAO-26-108694). The other 120-plus bodies have no measured error rate at all, which is itself a finding to put in front of OMB.
- **Eight universal screens (U1 to U8) cover every body cheaply.** Six run on public data already in the entity spine (award-level number tests, split awards, contract growth, recipient integrity, Single Audit findings and DATA Act reconciliation); two need internal data (charge cards and payroll, death and Do Not Pay matching).
- **Four new shared screens (C4 to C7)** join C1 to C3: credit and guarantees, benefit and annuity rolls, settlement and refund distributions, and time-and-voucher billing.
- **22 bodies get their own idea IDs** (Tier B), such as RRB-1 (railroad disability benefits), USPS-1 (postal contracts outside FPDS), JUD-1 (Criminal Justice Act vouchers) and CFPB-1 (Civil Penalty Fund payments).
- **Timing:** universal screens are built on the top 33 in Phase 1 weeks 11 to 14 and then run on every body in a **Phase 1b, weeks 17 to 26 (2027-03-08 to 2027-05-14)**, so the Phase 1 plan does not slip.

2 How we built the list

Source	What it gave	Rows
USAspending toptier agency list, FY2026 Q4, pulled 2026-11-03	Every agency that reports to USAspending, with outlays, budgetary resources and obligations	111

Source	What it gave	Rows
31 U.S.C. 9101 (Government Corporation Control Act)	Wholly owned and mixed-ownership government corporations	26 named; 7 report through a parent department, 4 are on USAspending's list, the rest are closed, merged or privately owned
Our additions	Bodies that spend federal money but are not on USAspending's list: Postal Service, TVA, Amtrak, federal judiciary, Library of Congress, GPO, Architect of the Capitol, CBO, Congress, Smithsonian, Legal Services Corporation, Corporation for Public Broadcasting, U.S. Institute of Peace, FHFA, Farm Credit Administration, Postal Regulatory Commission	16
Out of scope, listed for completeness	Federal Reserve; Fannie Mae, Freddie Mac and the Federal Home Loan Banks; Farm Credit System banks. None is funded by appropriations, and each has its own regulator and OIG	3

Notes on the figures:

- Outlays are USAspending's FY2026 figures as reported by agencies; they may be revised. The raw pull is in data/usaspending_toptier_fy2026.csv and the classified list in data/all_agencies.csv, built by `analytics/universe/build_universe.py`.
- We give **no dollar figure** for bodies outside USAspending's list, because we have not yet pulled a comparable source. Their spending is to be sized from their own financial reports in week 17.
- Nine listed agencies report zero FY2026 outlays. One of them, the Railroad Retirement Board, pays billions in benefits that are not reported to USAspending under its name; it is treated as Tier B.
- Statutory names that no longer exist (the Resolution Trust Corporation, closed 1995; the Panama Canal Commission, ended 1999; the Pennsylvania Avenue Development Corporation, dissolved 1996) are not counted.

3 Tiers

Tier	Meaning	Count	Coverage
A	The top 33 by outlays, plus 7 government corporations inside them (CCC, FCIC, Ginnie Mae, FHA Fund, Federal Prison Industries, CDFI Fund, St. Lawrence Seaway)	33 + 7	Own plan in the roadmap, plus all universal and relevant shared screens
B	Outside the top 33, with a distinct payment stream worth its own investigation idea	22	Own idea ID, shared screens, universal screens

Tier	Meaning	Count	Coverage
C	Smaller agencies, commissions, boards, foundations and legislative bodies	63	Universal screens, plus a shared screen where one fits
D	Listed by USAspending with no FY2026 outlays	9	Check where their spending is reported; no screens until it is found
X	Out of scope: not appropriated funds, own regulator and OIG	3	None; referenced only where they touch a federal program

4 Universal screens: one set of tests for every body

Every body that spends money awards contracts or grants, pays staff, holds charge cards and reports to Treasury. These eight screens use the same code for all of them. Section numbers refer to the forensic methods handbook.

ID	Screen	Data	Method (handbook section)	Output per body	Phase
U1	Award number tests	USAspending contract and grant actions FY2020-FY2026	First-two-digit Benford with MAD, round-number and duplication tests, bunching under the micro-purchase and simplified acquisition thresholds (3, 5.4)	Conformity table and any threshold spikes	1
U2	Split and duplicate awards	Same	Same recipient, same office, actions within 30 days each under a threshold but summing over it; repeated identical actions (4.1, 4.2)	List of action groups for review	1
U3	Contract growth	FPDS modifications	Ratio of current to base value against peers in the same product code; sole-source modifications after competitive award; robust z (5.2)	Contracts above the peer tail	1
U4	Recipient integrity	Entity spine and watch lists	Excluded links, new entity with large award, shared-attribute networks, co-location (7, 8)	Recipients with two or more independent signals	1
U5	Single Audit check	Federal Audit Clearinghouse (fac.gov)	Repeat findings, questioned costs, auditor concentration, drawdown-to-audit gaps (11.1)	Grantees with repeat findings and continuing awards	1

ID	Screen	Data	Method (handbook section)	Output per body	Phase
U6	DATA Act reconciliation	USAspending account (File A/B) and award (File C, D1/D2, F) data	Account-to-award gap, unlinked awards, subawards above the prime (11.1)	Share of spending not visible at payee level	1
U7	Charge card, payroll and vendor master	OIG charge card risk assessments (public); card, payroll and vendor files (internal)	Split purchases, merchant category tests, vendor-employee matches, audit-trail tests (4.2, 11.2)	Card and payroll exceptions	2
U8	Death and Do Not Pay match	Treasury Do Not Pay; payee files	Payments after death or to excluded payees (4.4, 9)	Payee exceptions	2

Why this is cheap. U1 to U6 run on data the entity spine already ingests for the top 33 (review plan items F3 and F4, plus fac.gov). Adding a body means filtering by its agency code, not building a new pipeline. The cost per added body is review time, roughly half a day of analyst time for a Tier C body with nothing unusual.

5 Shared screens, old and new

ID	Screen	Status	Members outside the top 33
C1	Contractor screen	In review plan	USPS, TVA, Amtrak, judiciary, legislative agencies, Smithsonian, NARA, Peace Corps, CSOSA, regulatory commissions with large contracts
C2	Research award screen	In review plan	NEA, NEH and IMLS (duplicate funding by text similarity)
C3	Grantee screen	In review plan	Regional commissions, Gulf Coast council, foundations, LSC, CPB, MCC, USAGM, USTDA, EAC
C4	Credit and guarantee screen	**New**	EXIM, FCSIC, NCUA, OPIC legacy portfolio; with SBA, USDA, HUD, ED, Treasury (CDFI), DFC
C5	Benefit and annuity rolls	**New** (Phase 2)	RRB, Armed Forces Retirement Home; with SSA, OPM, VA, DOL, PBGC
C6	Settlement and refund distributions	**New**	CFPB, FTC, CFTC; with SEC and DOJ
C7	Time and voucher billing	**New** (mostly Phase 2)	Federal judiciary and DC Courts (court-appointed counsel), USPS (workers' compensation providers); with HHS, DOL, VA

C4. Credit and guarantee screen. Reuses the SBA loan methods on every federal credit program: straw and shell borrowers through entity resolution, broker and lender centrality in the borrower network, bunching just under program caps, and repeat defaults by linked borrowers. EXIM publishes authorization-level data; other programs publish loan-level files of varying depth.

C5. Benefit and annuity rolls. Death, incarceration and concurrent eligibility tests on payee files, plus provider outliers in disability determinations. Almost all of it needs internal data, so its Phase 1 product is a single data-access proposal covering several payers at once, which is the cross-agency death data idea X-1 in the roadmap.

C6. Settlement and refund distributions. Agencies that return money to harmed consumers or investors (CFPB's Civil Penalty Fund, FTC refunds, SEC Fair Funds, CFTC restitution) pay through claims administrators. The risks are synthetic and duplicate claimants and administrator overbilling. Phase 1 reviews published distribution reports for unexplained per-claimant amounts; Phase 2 runs duplicate and identity tests on claims files.

C7. Time and voucher billing. Anyone paid by the hour or the service can bill an impossible day. The impossible-day test (more than 24 hours, or many days over 16) and peer outliers by matter type need voucher data, which the courts and DOL hold.

6 Tier B: new investigation ideas

IDs follow the roadmap's scheme. "Take to" is the body's own Inspector General unless noted.

ID	Body	Idea	Data	Phase	Take to
RRB-1	Railroad Retirement Board	Disability and sickness benefit outliers by employer, occupation and examining physician; the Long Island Rail Road disability prosecutions (from 2011) are the reference case	RRB statistical tables (P1); claims files (P2)	1b, 2	RRB OIG
RRB-2	Railroad Retirement Board	Annuities paid after death; joins C5	Payee files and death data	2	RRB OIG
USPS-1	Postal Service	Supplier and highway contract route screen. USPS buys outside the FAR and does not report to FPDS, so contract data come by FOIA or through the OIG	FOIA release (P1b); contract files (P2)	1b	USPS OIG
USPS-2	Postal Service	Workers' compensation provider outliers for postal claimants; joins C7	DOL OWCP data	2	USPS OIG, DOL OIG
TVA-1	Tennessee Valley Authority	Supplier integrity screen (C1); data access route to confirm	TVA procurement data	1b	TVA OIG
AMTRAK-1	Amtrak	Contractor and subcontractor screen on federal grants to Amtrak (C1, C3)	USAspending grants and subawards	1b	Amtrak OIG

ID	Body	Idea	Data	Phase	Take to
JUD-1	Federal judiciary	Criminal Justice Act attorney and expert vouchers: impossible days, peer outliers by case type (C7)	Voucher data via the Administrative Office	2	Judiciary (no statutory OIG); proposal to the Administrative Office
DCC-1	DC Courts	Court-appointed counsel vouchers, same tests as JUD-1 (C7)	Voucher data	2	DC Courts
EXIM-1	Export-Import Bank	Exporter, buyer and lender shell checks on authorizations (C4)	EXIM authorization data, SAM.gov, sanctions lists	1b	EXIM OIG
MCC-1	Millennium Challenge Corporation	Compact implementers and contractors against World Bank and other development bank debarment lists (C3)	USAspending, debarment lists	1b	MCC (via USAID OIG oversight arrangement, to confirm)
CFPB-1	Consumer Financial Protection Bureau	Civil Penalty Fund and redress payments: duplicate and synthetic claimant tests (C6)	Fund reports (P1b); claims (P2)	1b, 2	Fed Board and CFPB OIG
FTC-1	Federal Trade Commission	Consumer refund programs: duplicate and synthetic claimant tests (C6)	Refund reports (P1b); claims (P2)	1b, 2	FTC OIG
ARTS-1	NEA, NEH, IMLS	Duplicate funding of the same project across the three (text similarity on award descriptions), plus Single Audit findings (C2, C3)	USAspending descriptions, fac.gov	1b	Each OIG
REG-1	ARC, Delta Regional Authority, Denali, NBRC, SCRC	Overlap of regional commission grants with EDA, USDA Rural Development and each other for the same project and recipient (C3)	USAspending, fac.gov	1b	Each commission's OIG or designated OIG
RESTORE-1	Gulf Coast Ecosystem Restoration Council	RESTORE Act grants: subrecipient reconciliation and grantee screen (C3, U6)	USAspending, fac.gov	1b	Commerce OIG, which serves as the Council's OIG (to confirm)
LSC-1	Legal Services Corporation	Legal aid grantee screen with Single Audit findings (C3, U5)	LSC grantee data, fac.gov	1b	LSC OIG
CPB-1	Corporation for Public Broadcasting	Station grants against station financial reports (C3, U5)	CPB station data, fac.gov	1b	CPB OIG

ID	Body	Idea	Data	Phase	Take to
USAGM-1	U.S. Agency for Global Media	Grantee network and contractor screen (C1, C3)	USAspending, Form 990	1b	State OIG, which oversees USAGM

7 Tier C: how small bodies are covered

Most Tier C bodies spend mainly on salaries, rent and a modest number of contracts. For them the universal screens are the review: U1 to U6 in Phase 1b, with a one-page memo each stating what was run and either a lead list or "nothing actionable from public data". Groups:

- **Regulatory commissions and boards** (41, for example NLRB, EEOC, NTSB, CPSC, FEC): U1 to U6 and C1 for the few with large contracts.
- **Foundations and scholarship trusts** (Goldwater, Truman, Madison, Udall, African Development Foundation, Inter-American Foundation, Japan-U.S. Friendship Commission): C3 and U5 on their grantees.
- **Legislative branch** (Library of Congress, GPO, Architect of the Capitol, CBO, Congress, and GAO as an audience as much as a subject): C1 where contracts are reported, and congressional office disbursement reports for U1-style number tests.
- **Assessment-funded regulators** (FHFA, Farm Credit Administration, NCUA, FCSIC): their own spending gets U1 to U6; the systems they supervise are out of scope except where federal guarantees are at stake (C4).

8 Tier D: agencies with no reported outlays

Nine listed agencies show zero FY2026 outlays: the 400 Years of African-American History Commission, the Commission for the Preservation of America's Heritage Abroad, FFIEC, the Kennedy Center, the National Council on Disability, the Office of Navajo and Hopi Indian Relocation, the Southwest Border Regional Commission, the U.S. Interagency Council on Homelessness and the Vietnam Education Foundation. Some are funded through another agency's accounts, some are inactive. Week 17 task: find where each one's spending is reported, then move it to Tier C or retire it from the list.

9 Schedule

Weeks	Dates	Work
11-14 (Phase 1)	2027-01-25 to 2027-02-19	Build U1 to U6 on the top 33; validate U1 and U4 against the case library
15-16 (Phase 1)	2027-02-22 to 2027-03-05	Add universal screen results to the 33 review memos
17	2027-03-08 to 2027-03-12	Size Tier B bodies outside USAspending from their own financial reports; trace Tier D spending; file FOIA for USPS and TVA contract data

Weeks	Dates	Work
17-20	2027-03-08 to 2027-04-02	Run U1 to U6 on all Tier B and C bodies; build C4 and C6
19-24	2027-03-22 to 2027-04-30	Tier B ideas that run on public data (EXIM-1, MCC-1, ARTS-1, REG-1, RESTORE-1, LSC-1, CPB-1, USAGM-1, AMTRAK-1)
23-26	2027-04-19 to 2027-05-14	Memos for every Tier B and C body; C5 and C7 access proposals; government-wide summary for OMB and CIGIE

Phase 1b assumes the Phase 1 team stays in place. It adds no new data purchases; FOIA responses for USPS and TVA may arrive after week 26, in which case those ideas move to Phase 2.

10 What Phase 1b will and will not show

- It **will** show, for every federal body, which universal tests were run, what they found and what internal data would add.
- It **will not** produce savings. As everywhere on this project, a figure moves from Pending only through the stages in the methodology, and only confirmed dollars count.
- For most Tier C bodies the honest expected result is "nothing actionable from public data". That result still matters: it documents coverage for a government-wide proposal and shows where internal-control data (U7, U8) are needed.

11 Improper payment reporting, FY2025

Context only, never savings. Source: PaymentAccuracy.gov agencies and programs page, FY2025 data; "susceptible outlays" are outlays in programs the agency has found susceptible to significant improper payments, not improper payments.

Agency	Susceptible outlays ($M)	Susceptible programs	Improp payme rate
HHS	1,670,124	10	5.83%
SSA	1,494,212	3	0.76%
Defense (War)	241,689	8	0.72%
VA	201,103	7	1.09%
Education	185,708	3	0.71%
OPM	176,584	2	0.25%
USDA	148,306	10	9.05%
Treasury	105,743	7	26.54%
DOT	67,068	2	3.57%
SBA	66,238	8	12.29%
HUD	50,439	2	0.0%
Labor	41,634	2	12.16%
DHS	21,631	3	0.15%
FCC	2,741	2	5.03%

Agency	Susceptible outlays ($M)	Susceptible programs	Improp payme rate
AmeriCorps	478	2	2.64%

Every other agency on the page shows no susceptible outlays. GAO reports 64 programs with estimates in FY2025; the page's susceptible-program counts sum to 70, a difference we have not reconciled. Some programs show "did not report", including TANF.

12 Full list outside the top 33

Outlays are FY2026 USAspending outlays in millions of dollars; "not listed" means the body is not on USAspending's agency list. Coverage codes: U1-U6 public universal screens, U7-U8 internal universal screens, C1 to C7 shared screens. The top 33 are in the ranking.

Body	Kind	Outlays ($M)	Tier	Coverage
Millennium Challenge Corporation (MCC)	Government corporation	531	B	C3 U1-U6 U7-U8 (MCC-1)
U.S. Agency for Global Media (USAGM)	Independent agency	523	B	C3 C1 U1-U6 U7-U8 (USAGM-1)
Consumer Financial Protection Bureau (CFPB)	Independent agency	435	B	C6 C1 U1-U6 U7-U8 (CFPB-1)
Export-Import Bank of the United States (EXIM)	Government corporation	401	B	C4 U1-U6 U7-U8 (EXIM-1)
Federal Trade Commission (FTC)	Regulatory commission or board	356	B	C6 C1 U1-U6 U7-U8 (FTC-1)
District of Columbia Courts (DC COURTS)	Judicial branch or court-related	298	B	C7 C1 U1-U6 U7-U8 (DCC-1)
Institute of Museum and Library Services (IMLS)	Foundation, endowment or trust fund	217	B	C3 U1-U6 U7-U8 (ARTS-1)
Gulf Coast Ecosystem Restoration Council (GCERC)	Regional commission	179	B	C3 U1-U6 U7-U8 (RESTORE-1)
National Endowment for the Arts (NEA)	Foundation, endowment or trust fund	137	B	C3 U1-U6 U7-U8 (ARTS-1)
Delta Regional Authority (DRA)	Regional commission	75	B	C3 U1-U6 U7-U8 (REG-1)
National Endowment for the Humanities (NEH)	Foundation, endowment or trust fund	62	B	C3 U1-U6 U7-U8 (ARTS-1)
Denali Commission (DENALI)	Regional commission	49	B	C3 U1-U6 U7-U8 (REG-1)
Northern Border Regional Commission (NBRC)	Regional commission	44	B	C3 U1-U6 U7-U8 (REG-1)
Appalachian Regional Commission (ARC)	Regional commission	13	B	C3 U1-U6 U7-U8 (REG-1)
Southeast Crescent Regional Commission (SCRC)	Regional commission	11	B	C3 U1-U6 U7-U8 (REG-1)

Body	Kind	Outlays ($M)	Tier	Coverage
Corporation for Public Broadcasting (CPB)	Federally funded nonprofit corporation	not listed	B	C3 U1-U6 U7-U8 (CPB-1)
